

The Gazebo

Relax in style

14' x 12' GAZEBO

We look forward to the warm months of the year as a time when we can be outside communing with nature, gardening, catching some rays. Winter helps us forget that with those substantial perks of the season also comes the realization that sometimes nature bites, and that too much sun can be uncomfortable and harmful. And then there are

those April showers and August thunderstorms!

Enter The Gazebo. Literally! With a structure more detailed and refined than a standard pavilion, a gazebo can add a decorative focus to a large lawn as well as a pleasant place to while away an afternoon. Our gazebo is designed with the expectation that

The Gazebo

some owners will want to screen theirs in, allowing for enjoyment of the outdoors while keeping out aggressive bug life.

Adapt your gazebo for whatever your outdoorsy needs might be – for a summer kitchen, an entertainment space, or just a place to relax in a hammock and read a good book.

Quality Timber Frame Design

Brooks Post & Beam offers gazebo kits in pre-drawn sizes and with suggested ways to use them as screen houses, but you can also request a different size that works for your site and planned uses.

Since it's made with a Brooks frame, there's always the option to close in some of the gazebo with full or partial walls any time in the future.
